[Personal Portfolio](#)

Junior Software Developer | Front end Developer | Full Stack Developer

7 years of experience in the Hospitality industry, gaining valuable transferable skills in relationship building, strategic planning and management. Strong track record of quickly learning and adapting in new and complex situations. Eager to leverage a diverse range of talents in a new and engaging professional setting. Committed to continuous improvement and development.

## Areas of Expertise

- Frontend Development with React & Angular
- State Management with NgRx
- Monorepo Management with Nx
- UI/UX Collaboration
- Agile & Scrum Methodologies
- REST API Integration
- Communication
- Attention to Detail
- Problem Solver
- Customer-Centric Development
- Team Worker

## Technical Proficiencies

Languages & Frameworks: JavaScript, TypeScript, HTML5, SCSS/CSS3, Python  
Frontend Tools: Angular, React, Next.js  
Backend & Databases: Node.js, MongoDB, MySQL  
Dev Tools & Version Control: Git, GitHub, SourceTree, Vercel, Unit Testing, Integrated Testing  
Other: Agile / Scrum, REST APIs, Office 365

## Key Accomplishments

- Successfully developed and optimized Angular applications using RxJS and NgRx to enhance performance and maintainability.
- Delivered scalable frontend solutions using standalone Angular components and dynamic data tables.
- Built a dynamic budgeting app utilizing banking APIs as part of a full-stack program, streamlining financial data handling for users.
- Led hospitality teams of up to 15 members, building strong communication and leadership skills, now leveraged in technical environments.
- Transitioned from hospitality to IT, demonstrating adaptability and a strong capacity to learn modern web development practices.

## Work Experience

Digidom, Liverpool, United Kingdom  
Software Developer Intern

Dec 2024 - Feb 2025

- Developed and maintained frontend components using Angular and TypeScript, emphasizing standalone components and modular architecture.
- Implemented state management using NgRx Store, Actions, Effects, and Selectors, improving application scalability and maintainability.
- Structured applications using Nx monorepo for clean separation of concerns and easy scalability across multiple Angular apps.
- Customized and implemented ngx-datatable for creating highly interactive and responsive data tables.
- Collaborated using SourceTree and Git for version control in an Agile development environment.

**Bread Street Kitchen & Bar by Gordon Ramsay , Liverpool, United Kingdom**

Aug 2024 - Present

*Head Bartender*

- Managed bar operations and a team in a high-end, fast-paced environment.
- Used ProcureWizard stock control software to track inventory, automate ordering, and reduce waste by 15%
